## HOW TO READ THIS IT'S NOT AS BUSY AS IT LOOKS

One topic per week. Pillar rotates W1 → W2 → W3 → W4, then back to W1. You write about one thing per week and never repeat for a year.

Each topic is a "post family." One blog post + 3 social posts + 1 newsletter angle + 1 GBP update, all on the same theme. Five pieces of content; one decision.

The calendar is the plan. When the question "what should I post this week?" disappears, posting consistently stops being a willpower problem.

## WANT ONE FOR YOUR BUSINESS?

The full workbook turns each cell into a week of mapped content across every channel.
